Dear members of WG Batteries,

Thanks for joining today's call - please find **attached the updated trilogue letter**, which we plan to send to Council representatives in the coming weeks in an attempt to bring to their renewed attention the most problematic provisions proposed by Parliament. Following today's call, the document is **closed for comments and enters the final approval stage**.

Please therefore **raise by 15 June if the document crosses any red lines or anything major is substantially missing**. In the absence of further comments, we will treat it as accepted and start sending it to Council contacts late next or early the week after.

As outlined during the call, we have also managed, courtesy of our new member Lucid Motors, to establish a new communication channel with Parliament rapporteur Simona Bonafè (S&D, IT), and we will keep you updated on any outcomes.

See you next week at EVS35 in Oslo, or in our next WG Batteries call, whatever the case may be!

Best,

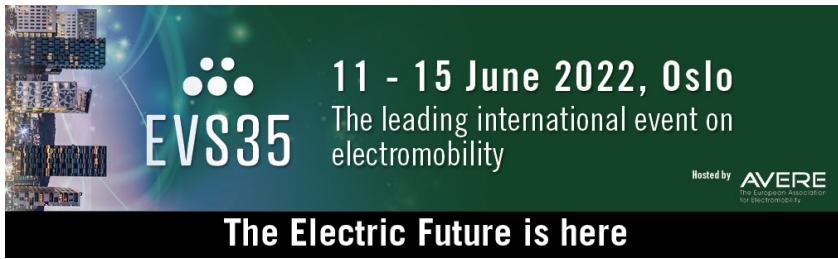

**Thomas Neumann**  
Policy Manager
