Smart Charging Evolution - The way to the Island

Jan Winkler
The Mobility House

Welcome to Porto Santo!

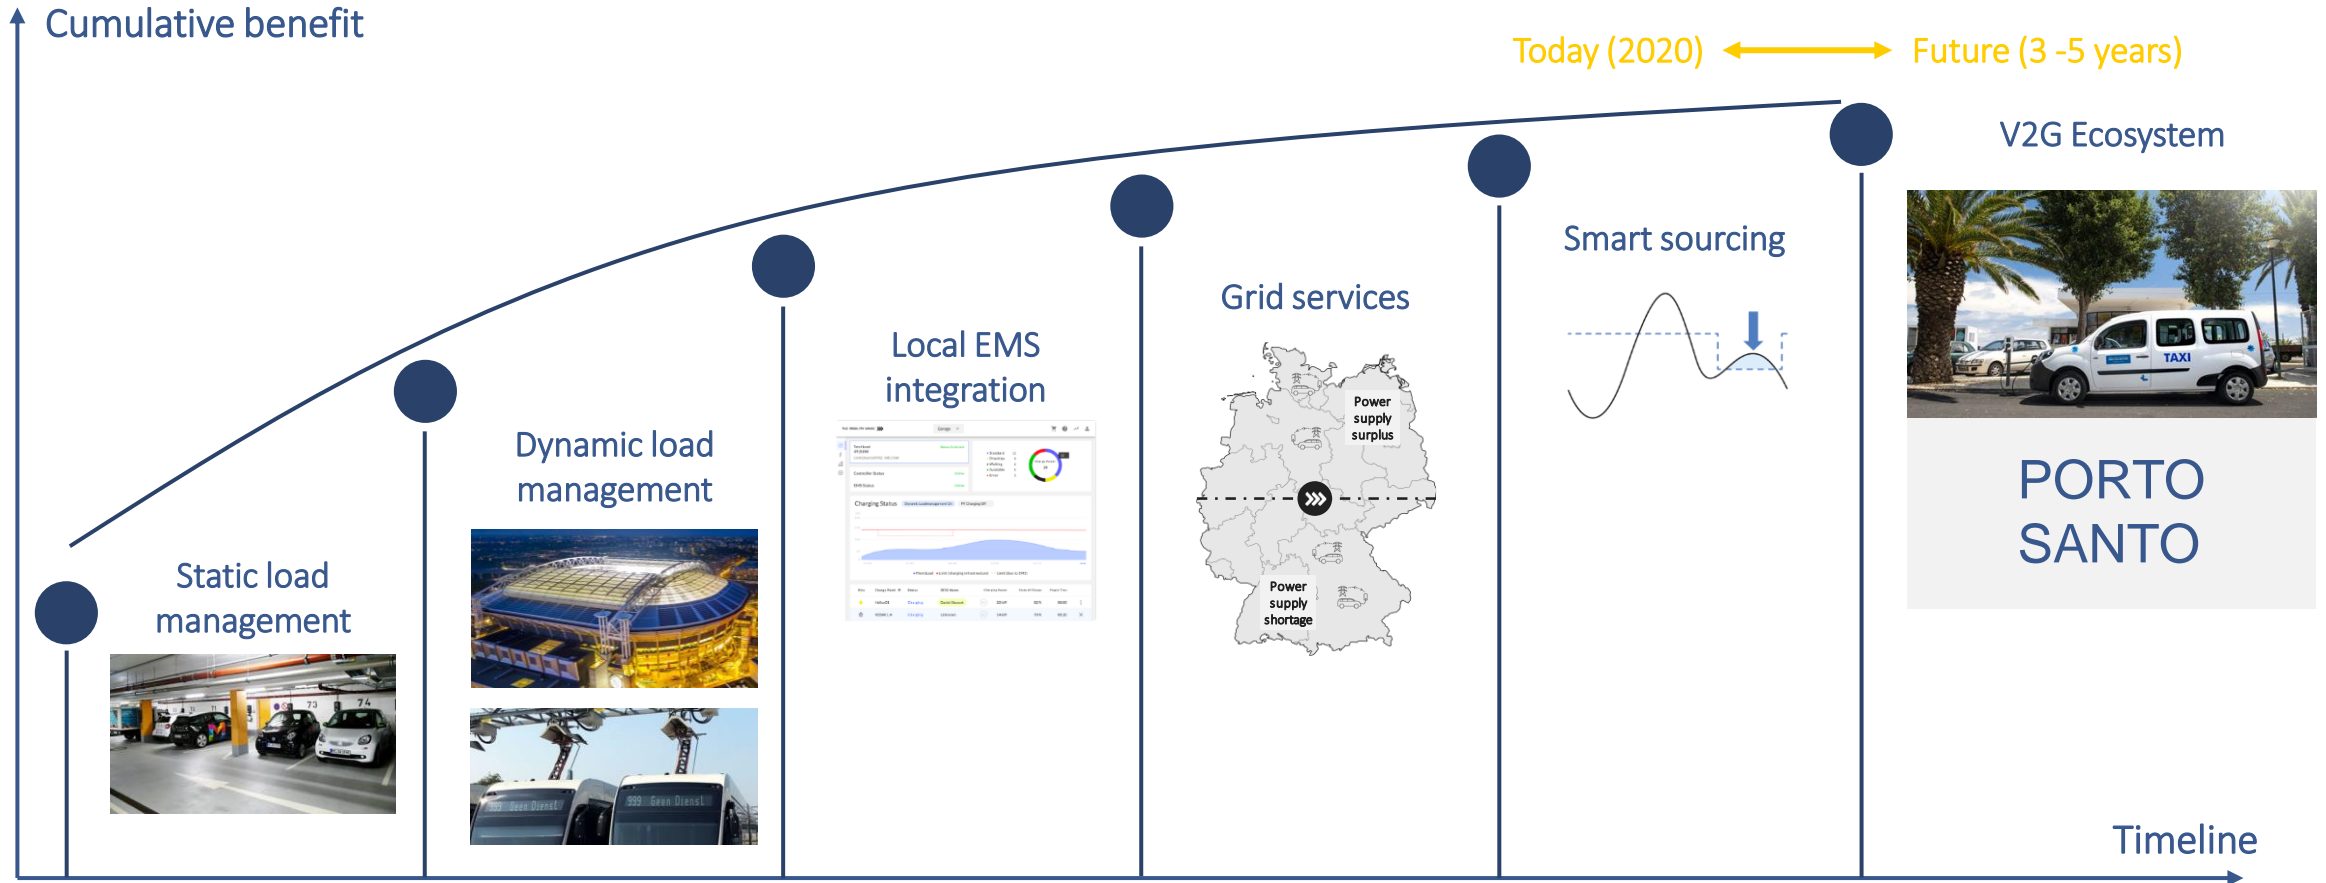

- ↓
 Create the first fossil free island
- ↓
 Decrease cost of electricity
- ↑
 Stabilize power grid with different assets
- ↑
 Increase renewable energy sources

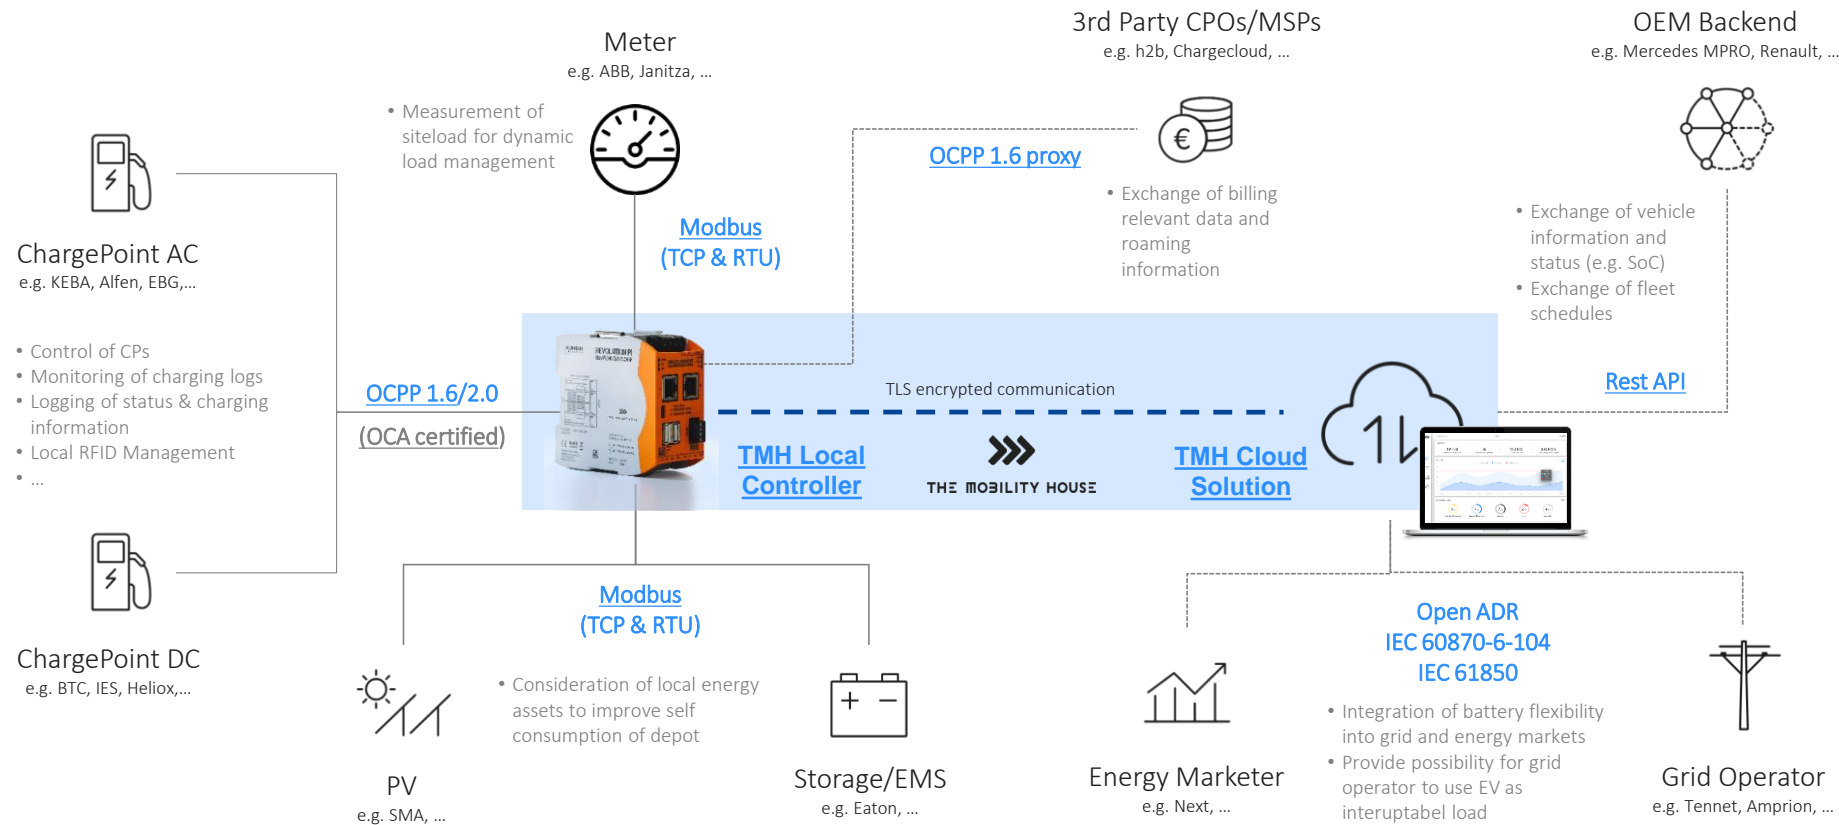

Project Partners: The Mobility House (TMH), Groupe Renault, Empresa de Electricidade da Madeira S.A.

The evolution of smart EV charging.

ChargePilot – a product for locally controlled smart charging with open interfaces

Unique system design:

- > Local control for maximum safety & reliability & fast response time
- > No lock-in with hardware brand or technology, allowing full customer flexibility
